

Folding gates secure and seal off any area, including hallways, doorways, retail counter areas, flea market booths, theatre stages, pallet racks, shelving and more.

When not in use, gates easily retract and pivot out of opening allowing free and open access.

Left: Pair gates meet in the middle and lock with padlock hasp. Right: Single and door gates lock onto a wall mounted locking bar with padlock hasp. Padlock sold separate.

Standard installation – Left: 2" Bracket allows top of gate to be mounted on wall surface or recessed. Right: Gates bottom pin inserts into floor hole.

Left: Pair gate cane bolt inserts into floor hole and is secured by a gussett angle. Right: Pair gates over 10' wide and single gates over 6' wide feature lockable center web drop pin.

Pair gates larger than 20' wide and single gates larger than 11' wide include outrigger with axles for additional rigidity and security.

Accessories

Cylinder Lock: Pre-installed at the factory.

Padlock: 2" hardened steel with plated shackle.

Gate Handle: For easier opening and closing.

School Strap: Allows Pair Gates to be locked in retracted position.

8' Post: Mount single or pair gates to posts instead of wall or casing. Sold separate.

H Bracket: Mounts overhead in center of gate. Provides additional security and rigidity.

6" and 9" Brackets: Extends gate 6" or 9" from wall or casing to clear overhead door tracks or bollards. Sold separately.

2" Rubber Caster: Non-marking caster protect linoleum, floor tile and carpet from scratches.
